PROFESSIONAL EXPERIENCE

Level Up Consulting – Chicago, IL January 2026 – Present

Senior Business Consultant

Level Up Consulting partners with small and mid-sized organizations to strengthen operations, improve business processes, and support strategic initiatives.

- Provide consulting services focused on business optimization, workflow improvement, and operational scalability for growing organizations.
- Advise leadership teams on project management frameworks, technology adoption, and process improvements that enable more efficient execution of strategic initiatives.
- Support organizations in implementing AI-driven tools, workflow automation, and improved operational structures to enhance productivity and growth.
- Lead consulting engagements that bridge business strategy with execution through structured project management practices.

TotalMed, Chicago, IL (Remote) October 2025 – Present

Senior Healthcare Workforce Consultant

TotalMed partners with hospitals and healthcare organizations to address physician and advanced practice provider staffing needs across the United States.

- Manage complex healthcare workforce initiatives connecting physicians and advanced practice providers with healthcare systems facing critical staffing shortages.
- Work closely with hospital leadership and clinicians to identify staffing solutions aligned with operational and patient-care needs.
- Coordinate with credentialing teams and hospital administrators to ensure efficient onboarding and integration of clinicians.
- Provide consultative workforce planning support to help healthcare organizations maintain continuity of care.

Blue Health Intelligence, Chicago, IL October 2021 – September 2025

Senior Project Manager

Blue Health Intelligence is a SaaS/DaaS company that provides services to healthcare organizations that help in improving patient care, reducing costs, and optimizes performance through data and actionable analytics. I manage the projects that are related to AI based products, in addition to products focused on improvement of user accessed front-end tools.

- Drive GenAI product innovation. Lead cross-functional teams (data science, engineering, clinical SMEs) on multiple generative-AI initiatives:
 - Patient-Journey Intelligence Platform: Deployed an LLM-powered application that analyzes, compares, and predicts patient journeys by phenotype.

- CSR Performance Accelerator: Integrated real-time GenAI insights into the CRM, surfacing claims-data trends that cut call-handling times and boost member-satisfaction scores for customer service reps.
- Delivered \$10MM revenue uplift. Managed a 170-stakeholder program that launched a front-end cost-transparency tool adopted by national health-plan clients.
- Generated ~\$48 K savings per high-risk member. Led development of a predictive-analytics product that identifies and mitigates emerging health-risk factors.
- Unified analytics ecosystem. Orchestrated a cloud-migration project that merged three legacy platforms into a scalable, single-tenant SaaS environment—improving performance and reducing infrastructure spend.
- Instituted enterprise-wide QA framework. Embedded a risk-based testing process now adopted across four dependent product lines, cutting defect-leakage rates.
- Optimized resource utilization. Implemented a capacity-tracking tool that aligns staffing with priority backlogs, sustaining lean delivery without overtime spikes.

LocumsPro, Chicago, IL

January 2018 – October 2021

Program Manager

LocumsPro is a healthcare staffing company that has found success in the industry due to its ability to allow providers and hospital clients to “self-manage” their accounts via an online, interactive community and match-making algorithms.

- Collaborated with sales, marketing, and IT teams on the required functionality of the new CRM; I was able to lead the project team to launch on time and within budget.
- Managed company locum tenens sales teams related to all medical specialties and ensured regular growth via monitoring KPIs.
- Oversaw the full integration process of the new VoIP system during the transformations taking place over the NeuroLocums to LocumsPro transition.
- Assisted in conceptualizing and managing the project that would release the NeuroLocums website and interactive application features that are used for pre-screening users and submitting data directly to clients.

CHG Healthcare - CompHealth, Midvale, UT

March 2013 – January 2018

Staffing Consultant

CompHealth is a healthcare staffing company that specializes in surgical and medical placements. They are the largest firm in the industry and are known for their Kaizen approach to business and continuous improvement.

- Recruited, qualified, and actively sold a portfolio of Cardiovascular, Vascular, and Neurological Surgeons to health systems around the country to be selected for providing coverage on a contractual basis through locum tenens.
- Negotiated pay-rates with the physicians and worked with my team to get them placed in roles that they were needed.
- Actively managed accounts and brought in an annual gross profit amount of \$2.5 – 3 million dollars per year.
- Achieved President’s Club 2015, 2016, and 2017.
